NOTES

- *1 Flying toward the constructed wetland.
- *2 One juvenile flew in from the S., landing on a S. snag, then later flew N., when one adult displaced it.
- *3 One adult female on a low log in W. meadow, then seen flying near a juvenile male.
- *4 All four resident adults (both pairs) were seen on their respective territories.
- *5 One juvenile (Peales race) first seen in the W. meadow snag, then later in the S. snag on the lagoon island.
- *6 A male seen just N. of the nursery.
- *7 One male on a stake near the new amphibian pond, and one female on a constructed wetland nest box.
- *8 One sub-adult in a small tree at the SE. corner of the constructed wetland and just N. of the far S. pond.

MORE NOTES

One Barn Owl was seen inside the nest box just S. of the site.

Also noteworthy were the unseen birds, House Sparrow, Killdeer, juncos.
